Policy for DIT websites’ identity, development and hosting
This document outlines DIT policy regarding website development, branding and hosting.

1. Procedures
If you wish to set up a new section on the DIT website or a new standalone website you must firstly complete a web project initiation document and send it to the web team at web@dit.ie. All websites are hosted on the DIT CMS, Sitemanager by Terminal Four.

2. Design
All pages showing under the domain name http://www.dit.ie/ are part of the main DIT website design. There is a range of templates available for use on the CMS. The following templates are designed to suit different areas of the DIT website. Most can be adapted for other areas, while some are specific to their original purpose. Please contact web@dit.ie for more information

- Admissions Office
- Arthur Ryan Retail Centre
- Academic Writing Centre
- Box Template
- Business
- Chaplaincy
- College of Arts & Tourism

- Part-time Courses at DIT
- Postgraduate
- Research & Enterprise
- Springboard
- Study at DIT
- Student Printing
- Student Services
- Study at DIT
- Undergraduate

All websites should meet DIT guidelines for website design:
The specific top bar navigation should show on every page - see http://dit.ie/creativearts/ or http://dit.ie/currentstudents/studentservices/. Code for this section is available from the Web Office.

Website colour scheme should fit DIT brand palette – see http://dit.ie/media/web/DIT%20Brand%20Guidelines.pdf

Code must be standard and accessible to level AA as described by W3C. Code may be checked at http://validator.w3.org/

For alternative hosting arrangements, a business case can be made to the Public Affairs office.
