

MSc SPATIAL PLANNING

MSc Spatial Planning is a 2.5 year part time programme aimed at experienced professionals working in the built environment who wish to become competent in the practice of planning and obtain a professionally recognised planning qualification.

The multi-disciplinary environment fosters a creative atmosphere of interactive, problem-based learning. Teaching takes place in boardroom-style symposia and students are set real-life projects often involving actual problems facing planning agencies.

The course is the only part-time course accredited by both the Irish Planning Institute and the Royal Town Planning Institute and has an active alumni, the Spatial Planning Graduate Network.

Course Content & Delivery

Students undertake a range of modules, seminars and field-trips covering all areas of the social and environmental sciences, including planning law, development management, infrastructure planning, area planning, environmental assessment and urban design. The completion of a dissertation allows students to explore a specific and relevant planning issue on an in-depth basis.

Entry Requirements

Candidates are interviewed and should have a minimum of five years relevant experience in a professional capacity, an appropriate honours degree (2.2 grade or higher) and an ability to demonstrate professional activity that is relevant to spatial planning.

How to apply

Applications are made online at www.dit.ie/postgrad/howtoapply.

Testimonials

'The best part was the interaction and common learning.'

DT123 student 2009

'I found the course content to be spot on and I also found the mix of practical work and lectures to be very good. All the staff have been excellent and I appreciated the balance and different perspectives the different staff brought to the lectures.'

DT123 student 2010

'Very helpful to me in my work. Very practical and relevant.'
