Safety Method Statement - McGinley Engineering Ltd

Description of Work & Location	Plan of Access and Egress for staff carrying out works at: DIT Linen Hall, Henrietta Place, Dublin 1
Work Operations	Access to the site is through main gates off Bolton Street. Access to building is via porters office All workers and visitors must sign in/out at porters office. Any visitors/new staff must report to site foreman. Prior to access being granted all visitors must adhere to PPE regulations. All access routes to work areas are to remain clear and tidy at all times. Under no circumstances are materials/equipment to be left in stairwells, corridors or fire escapes. All work areas are to be covered off to prevent public access. Appropriate signage will be in place advising of local hazards.
Control of Operations	The site foreman Mr. Dessie Gibbon will oversee and assume over control of operations during the works and the Mr. John McGinly, Project Manager will oversee the project.
Supervision	Mr. John McGinley will supervise all John McGinley Engineering Ltd's employees during the works and ensure that all safety legislation and regulations are adhered to.
Pre-Site Preparation Work	Site preparation will be carried out by John McGinley Engineering Ltd.
Storage / Materials / Handling	There a no special requirements for the storage of equipment or materials.
Competence of Operatives	The work will require a number of trained and competent operatives. All of which are deemed competent by John McGinley Engineering Ltd.

Safety Method Statement - McGinley Engineering Ltd

Accompanying Assessments

Please see:
Prelim Health & Safety Plan and Risk Assessment (May 2011)

Plant and Equipment

There are no special tools being used except the usual construction hand and power tools.

Safety of 3rd Parties

The proposed access controls and the existing access controls are deemed as being sufficient to reduce the risk to 3rd parties to an acceptable level.

PPE Requirements

All employees of John McGinley Engineering Ltd have been issued with PPE appropriate to the task and will wear PPE as required by DIT guidelines, John McGinley Engineering Ltd Policy and Safety Regulations.

First Aid Arrangements

First Aid Kits and First Aiders are available to John McGinley Engineering Ltd on-site as required under the General Application (First Aid) Regulations 2007.

Emergency Procedure

In case of emergency, all John McGinley Engineering Ltd's employees will follow local DIT procedure.
